OBJECTIVES

The delivery of better, more effective treatment to patients at lower cost is a challenging job for the healthcare professionals. In the future, pharmaceutical manufacturing will need to employ innovation, cutting edge scientific and engineering knowledge, and the best principles of quality management to respond to the challenges of new discoveries. The regulatory bodies have to take the responsibility for developing standards to support the introduction of innovative tools and technologies and approve technology-enhanced products. The discussions in the conference will provide information on the current state of pharmaceutical manufacturing, challenges faced, and opportunities for improvement. The purpose of this conference is to share and/dissipate information of the latest ideas, cutting-edge technologies and innovations shaping the future of pharmaceutical education & research, development and manufacturing.

ABOUT THE INSTITUTION

Gupta College of Technological Sciences (GCTS) is a pioneer professional institution in Indian pharmaceutical education. It was established in the year 2000 under Trinity Trust and today there are more than 400 students pursuing different courses of their choice at both B.PHARM and M.PHARM course. In the last 19 years, GCTS has reached to new heights through imparting high quality of education & producing pharmacy professionals for the benefit of mankind.

VISION

To achieve excellence in innovative pharmacy education by discovering remedies provided by mother-nature through scholarly research and provide service to society and profession thus improving the healthcare of rural and urban community.
